

What comes next "Deaf - - - " ? Whatever you think of, I couldn't think of anything good or complimentary.

A few people have even said that they would rather be blind than deaf !

My misspent youth means I will work till I drop but, not if I'm unemployable.

So, as my high frequency hearing continues to deteriorate with my advancing age, along comes EarZin for a tiny amount of money for BOTH EARS !

Now my hearing is better than anyone of any age in meetings I attend.

I don't need to watch or see them speak any more to take notes or listen to my two way radio at its lowest volume setting !

I will remain employable and enjoy the whole world of sound.

I hope you will too !
